Description

A user of Library Management Software is not able to renew the book which he/she has issued already And after adding 2 or more than 2 books in the book issue category to issue them, the application is getting crashed.

“Steps to Reproduce”

1. Go to the Library Management Software Application
2. The user should add book details to renew the book he issued before
3. Look for the books you want to issue
4. Click on the add to issue the book
5. Go to book issue category
6. Checkout for Payment and Delivery

Expected Result : The books should get renewed which are previously issued and unlimited books should get added to the book issue category.

Actual Result : The previously issued books are not getting renewd and unlimited number of books should get added to the book issue category.
